Estimate Request Form (1)

Date	Project

Ship To: ** Be sure to include your contact name, phone & fax number **

This form is to be used when requesting an estimate for true radius glass in the format (Outside Girth x Height x Outside Radius). Make sure that any information about the thickness, color, edge work and any information (if any) about such things as beveled edges or special tints that would go to one surface or the other are all properly marked.

Example: 1/4" Clear / Pencile Polished Edges / 1" Bevel on #1 Surface
 1pc - Outside Girth= 24" x 48" Height x 72" Outside Radius

Note: The outside radius is not the same as the outside depth. The radius is half the diameter of a complete circle. The depth will only be the same number as the radius if you are measuring a true half circle (180 degree bend).

Thickness, Color & Edge Work Specifications

Quantity	-	OutSide Girth	X	Height	X	OutSide Radius

*** Attention *** Prices will be based on sizes provided by the customer, any changes to the makeup, quantity, girth, height, radius, (ect.) may be subject to price correction.
